FAQ: "Does EasyMatch install a product called doPDF v7? It's on our new computer in the programs and printers. I don't know where it came from."

The "doPDF v7" program is installed with EasyMatch QC and EasyMatch QC-ER to be used as PDF print driver to create User Diagnostic Reports in PDF format after these tests are run.

We started using "doPDF" as of WIN 7 and used "PDF Creator" prior to that for WIN XP installations.

Most Users have Adobe PDF Reader on their desktop set as default program to open all PDF files, although doPDF and PDF Creator will do this as well if Adobe PDF Reader is not present.
