After downloading please install as follows.

- 1) Double click EasyMatch OL ST Client.exe
- 2) Choose REPAIR and click FINISH when completed
- 3) Double click EasyMatch OL ST Server.exe
- 4) Choose REPAIR and click FINISH when completed.
- 5) Open EasyMatch OL Client by double clicking on the desktop icon. The first time you will need to enter the computer name under System Setup/Data Storage and then select TEST to check the name.

You may run the EasyMatch OL simulator while waiting on the sensor to arrive.

To run in Simulation mode follow these instructions.

1) Open the Services and select HunterLab EasyMatch OL ST

- 2) If the service is STARTED then you must stop.
- 3) Under the Properties add the string 0 SIM to the start parameters. The 0 is the number zero.

Hunter Lab's EasyMatch OL ST Properties (Local Computer)						
General Log On	Recovery Dependencies					
Service name: EasyMatchOLSTServer						
Display name: Hunter Lab's EasyMatch OL ST						
Description:	* *					
Path to executable: C:\Program Files (x86)\HunterLab\EasyMatch OL ST Server\EasyMatchOL						
Startup type:	Automatic					
Help me configure service startup options.						
Service status: Stopped						
Stop Pause Resume						
You can specify the start parameters that apply when you start the service from here.						
Start parameters:	0 SIM					
OK Cancel Apply						

- 4) You must press the START button to begin simulation. If you click OK before Start, the simulator will not operate.
- 5) Once the service has started, you may run EasyMatch OL normally and check to see if it is generating data. The Simulator mode will stop if the Server is stopped or the computer is restarted.
